

Evince Translator

User Manual

Support:

support@evincedev.com

1. Step first :

For meta tag code and snippet code Go to ->

<https://translate.google.com/manager/website/add>

2. Step two :

For configure the extension

Go to -> System -> Configuration -> Evince Translate Extension -> Evince Translate Configuration

3. Step Three :

Here you can configure the Evince Translate extension as shown in below image.

The image shows the 'Evince Translate Configuration' interface. At the top, a yellow box with the text 'Here you can enable the extension' has a red arrow pointing to the 'Enable' dropdown menu, which is currently set to 'Yes'. Below this, the 'Meta Tag' section contains a text area with the following code: `<meta name="google-translate-customization" content="858e8fb2c6e24e10-f838e12906595d30-gbcbf21654d3c481e-25"></meta>`. A yellow box with the text 'Here is the meta tag and snippet code that will be added from the link below the text field.' has a red arrow pointing to this text area. Below the meta tag, there is a link: 'Go to <https://translate.google.com/manager/website/add> For Meta Tag'. The 'Snippet Code' section contains a text area with the following code: `<div id="google_translate_element"></div><script type="text/javascript">function googleTranslateElementInit() { new google.translate.TranslateElement({pageLanguage: 'en', layout: google.translate.TranslateElement.InlineLayout.SIMPLE}, 'google_translate_element');}</script><script type="text/javascript" src="//translate.google.com/translate_a/element.js?cb=googleTranslateElementInit"></script>`. A red arrow also points from the yellow box to this code area. Below the snippet code, there is a link: 'Go to <https://translate.google.com/manager/website/add> For Snippet code'. Each section has a '[STORE VIEW]' button to its right.

4. Step Four-

After enabling and put the code in the extension the front end look like this.
