## Evince Attribute Image Upload

- 1) Go to Admin => Catalog => Attributes => Add New Attribute  
Create your required new Attribute.

The screenshot shows the 'Edit Product Attribute' interface. On the left, a sidebar has tabs for 'Attribute Information', 'Properties', and 'Manage Label / Options'. The main area is titled 'Edit Product Attribute "Image"' and contains a 'Attribute Properties' section. In this section, the 'Attribute Code' is set to 'attribute\_image' with a note about uniqueness and length. The 'Scope' is set to 'Global'. Under 'Catalog Input Type for Store Owner', it is set to 'Multiple Select'. Other fields include 'Unique Value' (No), 'Values Required' (No), 'Input Validation for Store Owner' (None), and 'Apply To' (All Product Types). At the bottom, there is a 'Frontend Properties' section which is currently empty.

- 2) Select “Catalog Input Type for Store Owner” Multiple Select or Dropdown field type.

The screenshot shows the 'Edit Product Attribute' interface. The sidebar has tabs for 'Attribute Information', 'Properties', and 'Manage Label / Options'. The main area is titled 'Edit Product Attribute "Image"'. A yellow warning message says: 'If you do not specify an option value for a specific store view then the default (Admin) value will be used.' Below this is a 'Manage Titles (Size, Color, etc.)' section with tabs for 'Admin' and 'Default Store View'. Under 'Admin', there is a field for 'Image'. The next section is 'Manage Options (values of your attribute)'. It lists two options: 'image3' (position 0, is default) and 'Image2' (position 1). Each option has a thumbnail preview and edit/delete buttons.

- 3) Upload image and thumbnail image from admin and click on save .
- 4) Assign created attribute to attribute set for set on product.

## 5) select attribute option from product.

SKU: sora set

Weight: 200.0000

Set Product as New from Date:

Set Product as New to Date:

Status: Enabled

URL Key: product1

Create Permanent Redirect for old URL:

Visibility: Catalog, Search

Country of Manufacture:

Image: image3 (selected)

Color:

## 6) Paste below code view.phtml file for show attribute image on front.

Code :-

```

<?php
foreach ($_product->getAttributes() as $alias1):
    if ($alias1['attribute_code'] == "attribute_image"):

        $attribute = Mage::getModel('eav/entity_attribute')
            ->loadByCode('catalog_product', 'attribute_image');

        $valuesCollection =
Mage::getResourceModel('eav/entity_attribute_option_collection')
    ->setAttributeFilter($attribute->getData('attribute_id'))
    ->setStoreFilter(0, false);

        $preparedManufacturers = array();
        foreach ($valuesCollection as $value) {

            $preparedManufacturers[$value->getOptionId()] = $value-
>getValue();
        }
        if (Mage::app()->getStore()->isCurrentlySecure()) {
            $url_path =
Mage::getBaseUrl(Mage_Core_Model_Store::URL_TYPE_MEDIA, true) .
'wysiwyg/';
        } else {
            $url_path =
Mage::getBaseUrl(Mage_Core_Model_Store::URL_TYPE_MEDIA) . 'wysiwyg/';
        }
    ?>
<ul class="pd-listing">
    <?php
        $brand_html = "";
        if (count($preparedManufacturers)) {
            $data = $_product->getAttributeText('attribute_image');
            foreach ($valuesCollection as $value) {
                if ($data != $value['value']) {
                    if (!in_array($value['value'], $data)) {
                        continue;
                    }
                }
                $image = $url_path . basename($value['image']);
                $brand_name = $value['value'];
                if ($value['image']) {
                    ?>

                    <li>
                    " title="<?php echo $brand_name; ?>" width="30" height="30">
    </li>
    <?php
        }
    }
}
?>
</ul>
<?php
endif;
endforeach;
?>

```

## 18) Show On front.
