

# Evince Mobile API

## User Manual

**Support:**

**[support@evincdev.com](mailto:support@evincdev.com)**

# 1. Configure Extension :

Here you can enable the extension.

Admin -> System -> Configuration -> Evince

The screenshot shows the Magento System Configuration interface. At the top, there is a 'System' tab. Below it, there are three warning messages: a lightbulb icon indicating a web server configuration issue, a red exclamation mark for a successful SMTP Pro installation, and another red exclamation mark for outdated indexes. The main content area is split into two columns. The left column contains a 'Current Configuration Scope' dropdown set to 'Default Config' and a 'Configuration' sidebar with categories like EVINCE, SERVICES, and ADVANCED. The right column is titled 'MobileApi' and features a 'Save Configuration' button. The 'MobileApi' section has a 'Enabled' label and a dropdown menu currently set to 'Yes'. A red arrow points from a yellow callout box below to this dropdown. The callout box contains the text 'Evince Mobileapi extension system configuration settings'.

## 2. Configure with mobile application :

Frontend action for custom api

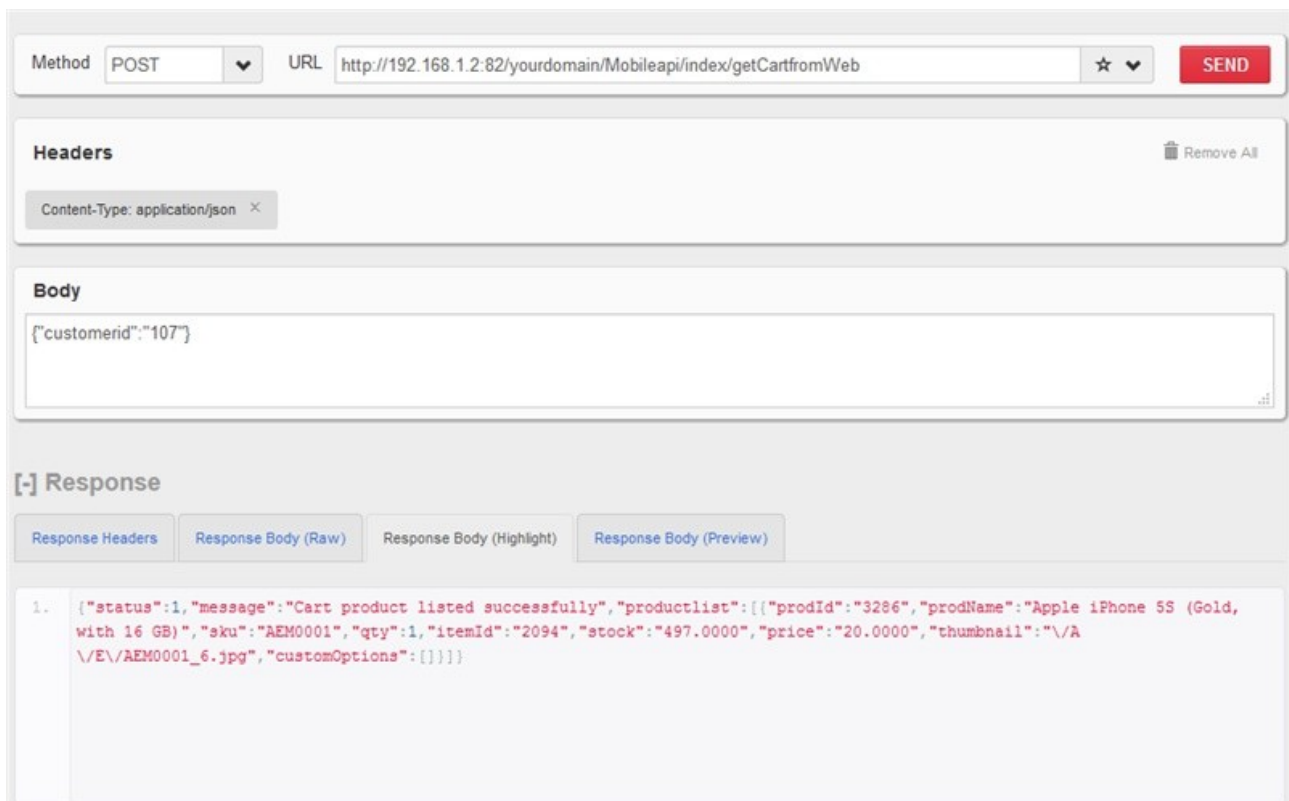

Example :

Module frontend index controller action url to get product list in api-

[www.yourdomain.com/Mobileapi/index/getProductList](http://www.yourdomain.com/Mobileapi/index/getProductList)

This will provide you the JSON encoded code in response for product list.

You can send request to server according to your module and get response. And with the help of RESTClient browser extension you will view the response data.

The screenshot displays the RESTClient browser extension interface. At the top, the Method is set to POST and the URL is `http://192.168.1.2:82/yourdomain/Mobileapi/index/getCartfromWeb`. A 'SEND' button is visible. Below the URL bar, the Headers section shows 'Content-Type: application/json'. The Body section contains the request payload: `{"customerid":"107"}`. The Response section is expanded, showing the response body in raw format: 

```
1. [{"status":1,"message":"Cart product listed successfully","productlist":[{"prodId":"3286","prodName":"Apple iPhone 5S (Gold, with 16 GB)","sku":"AEM0001","qty":1,"itemId":"2094","stock":"497.0000","price":"20.0000","thumbnail":"\\E\\AEM0001_6.jpg","customOptions":{}}]}
```

### 3. Email template configuration for Contact-us form :

You can configure email template of contact us form in api by going to admin  
-> Configuration -> Transactional Email  
Below is the screen shot of contact us from.

**Edit Email Template**
