1) After installing extension Go to -> admin -> System -> Configuration -> Evince -> Delhivery

Delhivery

Delhivery	
Delhivery Api Key	<input type="text" value="3bba4a8a4551c496928af3934218e9fcb213979b"/> [STORE VIEW]

After installing the extension, for setting up the extension go to
admin -> System -> Configuration -> Evince -> Delhivery

Here you have to enter api key provided by Delhivery.

After that you can use it for your webstore.

Note :

For call the static block at front-end, we need to create the static block first and call the static block at the page that you want or call the block in phtml file.

There are two way to call the static block-

1- Using phtml file-

```
<?php echo $this->getLayout()->createBlock('delhivery/delhivery_list')-  
>setTemplate('evince_delhivery/delhivery/list.phtml')->toHtml(); ?>
```

2- Using call in static block -

```
{{block type="core/template" template="evince_delhivery/delhivery/list.phtml"}}
```

2) In front-end there are check availability field for check the status of Cash on Delivery. Enter the ZIP code and the result about Cash on delivery availability will shown with the area name.

The screenshot displays a product page for 'SAMPLE PRODUCT \$100.00'. The product is 'IN STOCK'. Below the product name, there is a 'Sample Description' field. A quantity selector shows 'Qty: 1' and an 'ADD TO CART' button. Below this, there are links for 'Add to Wishlist', 'Add to Compare', and social media icons for email, Facebook, and Twitter. A 'Check Availability at' field contains the ZIP code '380001' and a 'CHECK' button. A red arrow points from the 'CHECK' button to a message box that says 'Product can be delivered to your district Ahmedabad'. Below the product page, there is a tabbed interface with three tabs: 'DESCRIPTION', 'ADDITIONAL INFORMATION', and 'REVIEWS'. The 'DESCRIPTION' tab is active, showing 'Sample Description'.

In front-end, we can check Cash on Delivery availability for the product by entering ZIP code. The result will show with the area name.
