

Auto Related Product

Magento 2.x

Extension User Guide

Official extension page: [Auto Related Products](#)

Introduction: Auto Related Products is a module which uses sets of conditions and actions as rules to establish relations between displayed products and related items. Displaying relevant related products will increase the average order value, reduce the number of abandoned carts, and simply help your customers browse through the store looking for what they need.

Show related products viewed or purchased together with a specific store item. Let customers easily find relevant products popular among store visitors and raise the number of purchases.

All Features List:

- It will display the related products based on current product's category and selected attribute.
- Admin can select three different kinds of attribute for related products.
- Manage the number of products to be displayed.
- Admin can set the products based on price like same as, less or more.
- Admin can select the option to 'sort by' the product and it will be displayed in ascending and descending order.
- Easy to customize pre-made rules in the backend.
- Fully admin control to change the rule.
- Easily usable with default-related product.
- Easily usable with custom theme design.
- It will provide the facilities to the store owner to show related product automatically for a product.
- Easy installation and configuration.

➤ Backend Functionality
