Evince Translator

The Evince Translate module allows you to easily integrate Google Translate into Magento, without any efforts. Adding the translation every time at the frontend, instead of, this module allows you to store the translation in your backend.

EVINCE
MAGE DEVELOPMENT

This demo will show you what you should do to configure Evince Translate into your site.

Features :

- Support for 75 languages

- Support for different base languages per store view

- Notify users when they are viewing an auto-translated page

- Easily set the location of the language switch language

- Easily change the confirm text

- Easy installation

- 100% Open source

- Compatibility with the Magento 2.0

Support:

support@evincemage.com

User Guide

1) After installing extension, for configure it, go to admin → Stores → Configuration → Evince Translate.

General Configuration

|		
Enable	Yes	[STORE VIEW]
Snippet Code	`<div id="google_translate_element"></div><script type="text/javascript">function googleTranslateElementInit() { new`	[STORE VIEW]

Go to https://translate.google.com/manager /website/add For Snippet code

After installing the extension, you will able to find the setting of extension inside admin -> Stores -> Configuration -> Evince Translate

Here you can enable/disable the extension and place the snippet code.

2) For Snippet Code, go to https://translate.google.com/manager/website/add and follow the instructions shows below -

Google Translate   Google Analytics   Webmaster Tools

Google

Website Translator - Add Website

Website Info   Plugin Settings   Add Plugin

Well played. Let's do this!

Website URL

What is the URL of your website?

[   ]   (e.g., www.example.com)

Website language

What is the original language of your website?

English ⇕

Cancel   Next »

For snipped code go to -
http://translate.google.com/manager/website/add
And fill out information.
Here insert your domain URL and then click on
Next button

Google

Website Translator - Add Website

Website Info | Plugin Settings | Add Plugin

Set the options you want for translating your website! You can change these options later too.

Translation languages

⊙ All languages

○ Specific languages

Display mode

Inline ⇕

○ Vertical

○ Horizontal

⊙ Dropdown only

Select Language ▼

Advanced

☒ Automatically display translation banner to users speaking languages other than the language of your page.

☐ Your page contains content in multiple languages.

☐ Track translation traffic using Google Analytics. Learn more!

Your use of the Website Translator is subject to the Google Terms of Service and Privacy Policy.

Website Translator - Add Website

Website Info → Plugin Settings → Add Plugin

Ready to roll! Now let's talk code.

Paste this code onto your website

Copy and paste the following code snippets onto every page you want to translate

Do not remove, conceal or alter the Google logo that is presented in websites containing the plugin.

Place this snippet where you'd like to display the Website Translator plugin on your page

```
<div id="google_translate_element"></div><script type="text/javascript">
function googleTranslateElementInit() {
  new google.translate.TranslateElement({pageLanguage: 'en', layout:
google.translate.TranslateElement.InlineLayout.SIMPLE},
'google_translate_element');
}
</script><script type="text/javascript" src="//translate.google.com/translate_a
/element.js?cb=googleTranslateElementInit"></script>
```
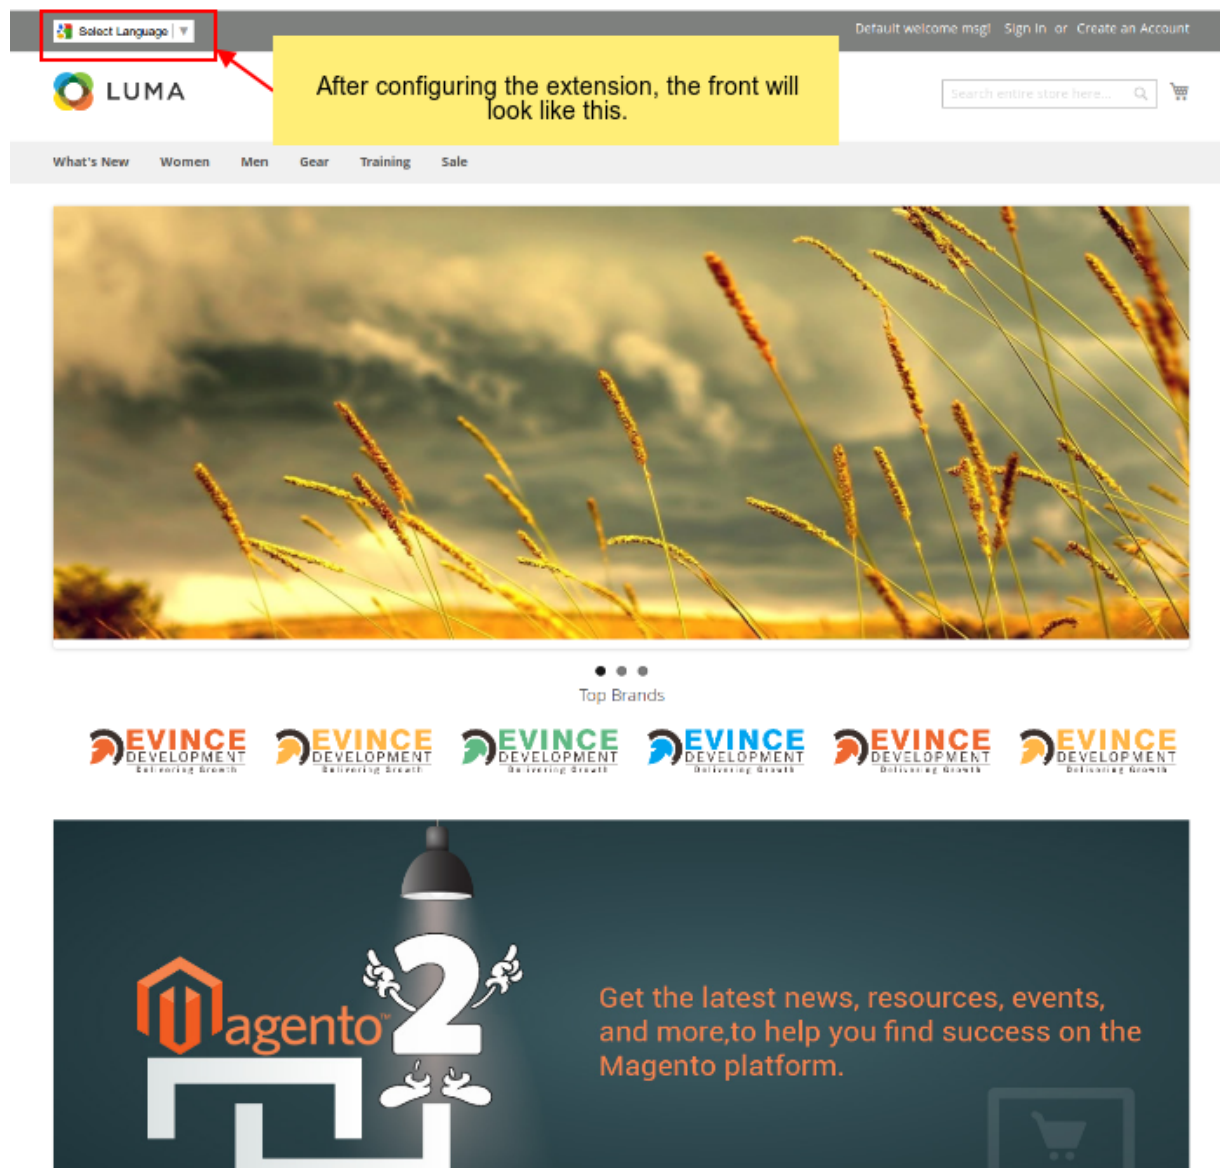

At last, you will find the code. Place this in extension configuration setting.

Give it a spin!

Now, unless you selected the automatic display mode option, you should see a language selector on your page.

Select Language ▼

Click the selector to translate the page!
