HIDE CATALOG

Magento 2.x

Extension User Guide

Official extension page: Hide Catalog

Hide catalog

Introduction: Adjust your selling strategy. Hide or replace the category and product pages to motivate visitors to perform certain actions. With the Customer Group Hide Catalog extension, you can restrict access to particular products and categories for groups of customers. This way you motivate customers to register, fill in a retailer or a wholesaler profile, etc.

You can hide all categories and products as well as redirect all catalog items and categories to a specific URL. Hide or redirect products and categories for certain store views as well. Hide all products and categories permanently and redirect customers to the 404 error page if users have direct links to them. You can also hide all categories or all products separately for certain customer group.

All Feature List:

- Ability to hide categories and products as per store view.
- Ability to redirect categories and products as per store view.
- Ability to manage products' and categories' visibility for specific customer groups.
- Visibility modes can be managed per category or per product.
- For hidden products and categories, you may redirect customers to an explainer page or simply any other page within the store.
- Provide customer groups with selective access to store catalog
- You may encourage your customers to login or register in order to view certain products.
- You can redirect store users to a custom CMS-page or to a 404 page, this way you motivate customers to register.

Backend Functionality

1. Configuration

dashboard	Store View: Default Config 👻 🕐					
SALES					Admin can enable or disable	
	EVINCEMAGE	^	General Options		the module from here	
	HideCatalog		Module Enable [store view]	Yes	•
